Blanket Order Plans

Convenient and Economical

Blanket orders let you take advantage of the highest level of quantity discount available. They let us forecast demand more accurately and maintain stock more effectively.

We must limit blanket orders to the following terms:

- Maximum order duration is 1 year
- Minimum total blanket order quantity is 864 cans
- Minimum quantity per release is 144 cans
- Shipments can be set up for automatic release on scheduled dates, or can be set up for manual release as needed. Orders are reviewed quarterly. Orders not on schedule to meet the total order quantity are subject to modification (with customer approval) or to cancellation. Discounts that are taken but not earned are subject to back-charge.
- Prices are guaranteed for 3 months from the initiation of the order. Beyond 6 months, if a change in the chemical market causes us to raise prices, you will be notified, and your discount percentage will be taken off of the new list price. Any price increase would not apply to any scheduled releases within 30 days of implementation of the price hike.
- Shipped automatically or manually — depending on the schedule you set up (Schedules can be changed as needed)
- Billed as released by you
- Cut your mold release costs

SAVE TIME — DON'T RUN OUT!

We carry your inventory for you and ship it Factory Fresh when you need it. (NOTE: Prices subject to change without notice)
